

VACANCY IT

Where:

VIVES University of Applied Sciences
Doorniksesteenweg 145
8650 Kortrijk
BELGIUM

Project description:

To rewrite our existing job forum youngpotentials.org and to add a few new features to the website, VIVES Kortrijk is looking for a new addition to the team.

Tech skills:

Full stack web development (both front-end and backend) should hold little to no secrets for you. Furthermore, you should also know your way around the following programs: HTML5, CSS3, .Net Core 2.1 or Microsoft SQL. Knowledge of Drupal integration and Docker would be a bonus.

Personal skills:

We are looking for an enthusiastic savant of IT who is fluent in English and able to work independently.

What to expect:

You will be put to work in a small team where you will have to make use of an agile methodology. Thanks to the Tech Talk Tuesdays we ensure a continuing development of knowledge. If you are driven to learn, fluent in English and if you feel right at home in the IT landscape, please contact Mr. Kurt Duyck (kurt.duyck@vives.be).
