Role

This is a unique opportunity for an inquisitive, resilient business analyst student, to gain experience in all aspects of software development lifecycle and business processes and change management. Mentored throughout, you will take on individual projects from start to finish, learn Agile project management techniques and business analysis techniques. The individual delivering this role will organize meetings with the business users to fully understand the issues they are facing, and then translate them into requirements for the technical teams to address using innovative technologies. This will provide a great addition to your CV and boost to future career prospects.

Tasks

- Meet with users to define and document business requirements
- Carry out gap analysis
- Create supporting documentation using appropriate business analysis techniques
- Work with stakeholders to develop business cases and deliver business needs
- Prepare testing scenarios and acceptance criteria
- Support business users to prepare testing data
- Organise business acceptance testing sessions, and obtain sign-off for the work performed

Personal Skills

- Enthusiasm and a willingness to learn and develop new skills and techniques
- Communication skills that allow the candidate to build strong working relationships
- Able to actively listen, analyse information, and challenge findings where required
- Able to manage work time effectively, including prioritisation of tasks and activities
- A methodical approach to problem solving and good analytical abilities,
- Strong written, verbal and presentation skills
- Proficient in the use of Word, Excel, PowerPoint and Visio
