Role

This is a fantastic opportunity for an enthusiastic, content and communications focused, digital marketing student, to get hands on experience in this innovative start-up company. Mentored throughout, you will assist in all aspects of digital marketing to drive interest and awareness the company's MedTech products. With an ambitious vision to improve millions of people lives, this host company has the potential to deliver true innovation. You will play an important role in their future success, making this a great addition to your CV and future career prospects. The work will be fast paced and exciting, with the opportunity to work on GTM strategies for products, as well as crowdfunding campaigns for the broader business.

Tasks

- Day to Day delivery of the content communication calendar
- Social media planning, posting and engagement, helping to build communities.
- Research interesting and engaging content for appropriate audiences and for social media and blog posts
- Researching and drafting press releases. Outreach and database of contacts
- Website maintenance, page building, blog, GA analysis, SEO optimisation, PPC, Paid Social
- Marketing support; events, webinars, database management
- Build, create and send email marketing newsletters
- Daily monitoring and weekly reporting on engagement metrics – likes, comments, shares and audience growth

Personal Skills

- Working towards a marketing degree or similar
- Proactive attitude, with the ability to manage own time, to multi-task and prioritise work
- Committed to getting the job done
- Excellent English verbal and written communication skills and able to write accurate and engaging social media posts
- Social media experience, personal usage essential, working knowledge highly beneficial

The Host Company

The host company benefits from 9 international patents covering the optical scanning technology. Their mission is to create a range of non-contacting handheld devices which, by their nature, will be useable for either non-clinical screening and measuring or personal monitoring for diseases such as diabetes.
