## Role

This is a fantastic opportunity for an analytically minded student to gain practical experience within this innovative leader in the automotive and defence engineering sector. Mentored throughout, you will learn to fully understand company cost models, measure actual performance as well as targeting key improvements. This is a great chance to take early responsibility and use your skills and knowledge to own and manage this key project. For the selected candidate, this hands-on project that will be a great asset to the company and addition to your CV.

## Tasks

- Produce project quotes based on customer requirements
- Fully understand quoted versus actual manufacturing costs per project
- Measure process performance in terms of parts delivered in full, quality and labour
- Identify, target and drive performance improvements, tracking and controlling their implementation
- Act as a key support to the resourcing and project management of client work
- Produce management reports; profit, productivity, and project updates
- Create dashboards and suggest improvements
- Liaise directly with process management team

## Desired Skills

- Background in business, process engineering or data analysis; ability to collect, organize, analyse and disseminate significant amounts of information with attention to detail and accuracy
- Strong Excel essential and good VBA and SQL skills a bonus, ability to produce a wide range of project documentation
- Experience of a customer focused, process and data driven environment
- Good eye for detail; able to work in a timely, accurate manner and team player
- Methodical; orderly or systematic in thought or behaviour
- Knowledge of computer systems
- Articulate; report writing/emails to clients

## The Host Company

Successfully trading for over 43 years this company has been manufacturing metal-based parts for the automotive, defence and general engineering sectors. Over the last 12 months the company has repositioned itself and attracted a significant amount of production work. To support this, investments have been made in machinery, infrastructure, and their people. 2022 will be a step change in the company's history and need to get it right, which is why they seek a talented individual to join them.
