Role

This is a fantastic opportunity for an influential, resourceful software developer, who has a keen eye for detail and great problem-solving skills, to work at this fast-growing SaaS Company. Mentored throughout, you will work closely with UI development, producers and project management and use your knowledge and expertise to develop and test well-structured and maintainable code, adhering to the team's current workflow and best practises to deliver projects and develop features on time, on budget and to agreed specifications. If you are looking to work in a buzzing, start-up environment, amongst peers with a huge wealth of experience and a real passion for digital and transforming career progression this is the opportunity for you.

Tasks

- Develop well structured, maintainable code on a wide range of projects and test

  Deep appreciation and understanding for best development practices

- Translate your understanding of technical requirements, issues and queries

- Maintain a good awareness of developments in the industry, assessing technical options, assisting others and sharing knowledge for continuous improvement and develop better ways of working

Desired Skills

- A developer with a passion to share knowledge and experience to colleagues.

- Strong knowledge of handwritten PHP, Javascript, HTML and CSS.

- Experience with Laravel, Symfony, CodeIgniter or similar MVC frameworks.

- Experience developing RESTFul APIs.

- Strong knowledge of Object-Oriented Design Patterns (PHP)

Good to have

- Experience working with a CMS e.g Concrete5, Drupal, DevOps, Systems Administration.

Host Company

Founded in 2018, the host is a start-up, whose technology provides skills maps and identifies learning and development needs, enabling employers to grow skills internally, and adapt to a skills first approach. This is crucial in differentiating workforce capability from average organisations to outstanding ones, ensuring staff are relevant and adaptable and ready to rise to the challenge of the new 'Fourth Industrial Revolution'. Their AI driven skills, forecasting and insights, develop purpose and engagement for staff and, agile talent planning for the business delivering training solutions in real-time.
