Are you eligible?

You are eligible for an ESPA internship if you are a registered student or have graduated within the past two years and have access to some form of grant funding?

Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is a fantastic opportunity for a proactive Software Developer, interested in Quality Assurance and testing, looking to gain practical experience within this successful host company who provide data management software for financial firms. Mentored throughout by experienced engineers, you will not only be using your existing skills but have every opportunity to learn new software and processes, making this a great addition to your CV and a real boost to your career prospects.

Please note this position is fully remote and can be run either from your home country or in the UK from several possible locations enabling you to have a full cultural experience, speak English daily, fulfil your internship obligations and take advantage of the Erasmus programme. The choice is yours!

Tasks

- Work together with developers to understand the capabilities of features they are building
- Help to write test cases for features under development
- Use exploratory testing techniques to discover unknown defects and regressions
- Help grow and maintain company's suite of automated user tests
- Contribute to a variety of projects and problems
- QA testing – completing end to end processing

Desired Skills

- Background in Computer Science or a related discipline
- Experience with manually testing software, writing test-cases and/or exploratory testing
- Competent in using C# or C
- Understanding of SQL structures and basic proficiency
- Knowledge or awareness of source control systems
- Knowledge of Power BI beneficial but not essential.

The Host Company

This highly successful host company specialises in providing data management tools to financial organisations throughout the world. They allow their clients to gain flexibility, transparency, and improved efficiency with their fully automated end-to-end data management solutions. There are plenty of opportunities to impress and be part of their success story.
